### **AES-A-273C WATER SYSTEM CORROSION INHIBITOR**

#### **DESCRIPTION AND USE**

AES-A-273C is a stabilized, liquid silicate base formulation utilized for the treatment of potable water distribution systems. The product may also be used in once through cooling water systems and under certain conditions in recirculating cooling applications.

#### **CHEMICAL FEEDING AND CONTROL**

AES-A-273C is normally fed continuously to the systems being treated by means of a chemical proportioning pump. The most effective means of control is to meter pace the feed pump. Another effective method that can be used where a well pump produces a constant output is to electrically wire the chemical metering pump for simultaneous on/off operation with the well water pump. The overall product application and the specific chemical feed and control methods employed will be specified by the technical representative servicing the facility.
